

# Agricultural Statistics WHEAT

Featuring County Estimates, 1925-1961

#### **FOREWORD**

This publication, which is devoted entirely to wheat, is the sixth in a series to be issued for each major crop produced in North Carolina. It has been prepared in response to a sharp increase in the number of requests for historical information on crop acreages and production at the county level.

County estimates on the acreage, yield, production, price and value of wheat from 1925-1961 are shown on pages 6 through 20. Statistics at the State level on the acreage, yield, production, price and value of wheat start with 1866 and are shown on page 3.

The publication of these data is made possible through a special project whereby State funds are matched with Federal funds received from the Agricultural Marketing Service, U.S.D.A., under provisions of the Agricultural Marketing Act of 1946.

#### PRODUCTION OF WHEAT IN NORTH CAROLINA

Wheat is grown in all sections of North Carolina and in practically all of the State's counties. Smallest acreages are to be found in the Mountainous counties of the west and in the tide-water areas of the Coastal Plains. Most of the counties in these latter areas produce very little wheat above farm needs. Although several interior Coastal Plain counties are among the leaders in production, the greatest concentration of the crop is to be found in the clay hills of the Piedmont. (See map, page 3).

Acreage of wheat harvested reached a peak of 800,000 acres in 1884 and again in 1900 and 1901, after which it stuck fairly close to a half million until 1920. A low of 265,000 acres harvested was reached in 1930. Since then the crop fluctuated from a little over 300,000 acres to slightly above a half million, arriving at 327,000 harvested in 1960. The preliminary estimate for 1961 places acres harvested at 392,000 or an increase of 20 percent over the acres harvested in 1960.

Reductions in acreages have been more than offset by larger yields per acre. Through the use of improved practices and more productive varieties, producers during the past 20 years have increased yields by 87 percent. In 1941, 7,347,000 bushels of wheat were produced on 474,000 acres for a yield of 15.5 bushels per acre. In 1961, 55 percent more wheat was produced on 17 percent fewer acres, namely 11,368,000 bushels of wheat from 392,000 acres. The 29 bushel yield for 1961 was the highest for the State of record and it exceeded the previous high of 25.5 bushels produced in 1956 by 14 percent.

Since 1950 there has been a considerable shift in the distribution pattern of wheat over the State. In 1951, 8.8 percent of the State's wheat acreage was in Mountain districts, 10.4 percent was in the Coastal Plains, and 80.8 percent was in the Piedmont. In 1960, only 5.7 percent was in the Mountains, 32.3 percent was in the Coastal Plains and 62.0 percent was in the Piedmont. Although the Piedmont is still well in

### PRODUCTION OF WHEAT (Cont'd.)

the lead, production has been increasing rapidly in all areas of the Coastal Plains. (See table below).

#### Acreages Of Wheat Harvested By Crop Reporting Districts, 1951 and 1960, North Carolina

<sup>\*</sup> Mountain Districts, I and 4; Piedmont Districts, 2, 5 and 8; Coastal Plain Districts, 3, 6 and 9.

With a small advantage in improved yields during the 1951-60 period, the Coastal Plains have come in for a larger proportion of the shift in production than for that in acreage. Yields in bushels by areas for 1951 and 1960 were respectively as follows: Mountains 21.7 and 22.6, Piedmont 22.7 and 21.5 and Coastal Plains 26.2 and 27.5. Accordingly, distribution of production in 1951 was 8.3 percent in the Mountains, 79.8 percent in the Piedmont, and 11.9 percent in the

Rank Of 12 North Carolina Counties Leading In Wheat Production, 1951 and 1960

19	51	19	960
Counties	Produced	Counties	Produced
	<u>Bushels</u>		Bushels
Stanly	572,600	Rowan	305,500
Union	500,080	Harnett	271,000*
Rowan	492,450	Johnston	268,000*
Cleveland	448,400	Iredell	243,000
Iredell	444,000	Catawba	237, 600
Lincoln	400,530	Stanly	233,500

Guilford	292, 100	Randolph	210,500
Cabarrus	242,780	Robeson	207,500*
Gaston	222, 130	Guilford	207,000

<sup>\*</sup> Coastal Plain counties.

Coastal Plains. In 1960, 5.5 percent of the production was in the Mountains, 56.7 percent was in the Piedmont, and 37.8 percent was in the Coastal Plains. All of the 12 counties in the State which led in wheat production in 1951 were located in the Piedmont. Of the 12 counties leading in the 1960 production, seven were located in the Piedmont and five were located in the Coastal Plains. (See preceding table).

With improved yields and the resulting greater profits per acre from growing wheat the crop has become more commercialized. The following table shows how producers disposed of their crops in 1950 and 1960:

Farm Disposition Of North Carolina Wheat, 1950 and 1960

Disposition	Percent of Tot	al Production
Disposition	1950	1960
Used for seed	8.5	6.5
Fed to livestock	24.0	17.0
Used in the home	11.8	5. 0
Sold	55.7	71.5
Total	100.0	100.0

Over the ten-year period the trend was toward a smaller proportion of the crop being used as home grown seed. Farmers have found it more profitable to buy certified seed or to use seed only one year removed from breeders. The practice of feeding relatively expensive wheat to livestock is also diminishing, with farm animals now getting mostly the low quality or under-developed portion of the crop. Likewise, producers are getting away from having some of their wheat ground or exchanged for flour at the mill, having found it to be more satisfactory to buy fresh flour for home use only when it is needed. With a much greater proportion of the crop going into commercial channels, the income from sales has shown a rapid increase. The money received by North Carolina farmers for sales of wheat has more than tripled over the past twenty years. In 1940 cash receipts from such sales amounted to \$3,105,000. In 1960 the cash receipts amounted to \$10, 196, 000.

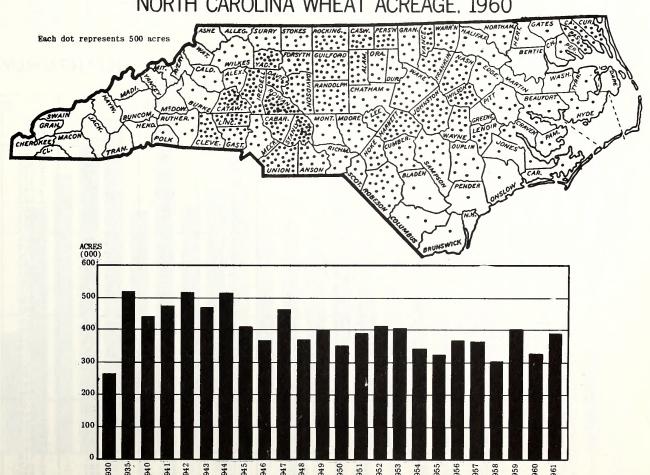

Among states in the Southeast, North Carolina ranks first in the production of wheat, with Virginia second, Kentucky third, and Tennessee fourth. Its rank in the Nation is nineteenth.

According to a 1959 survey the five leading varieties of wheat planted in the State and making up 80.7 percent of the total were: Anderson, 31.1 percent; Atlas 66, 22.3 percent; Thorne, 13.1 percent; Knox, 8.7 percent; and Coker 47-27, 5.5 percent.
